

# ASTRO Networks Victoria Inc.

*is proud to present*

**Caroline Pope**

*to speak on*

## **What is Animal Communication and What it can Teach Us**

Caroline is a professional Animal Communicator, Craniosacral and NES Therapist with 25 years experience in working with both animals and their human guardians. She has a background in animal behavior training and veterinary nursing in which she liaises with Veterinarians on a regular basis. Discovering Craniosacral Therapy for animals was a major breakthrough for her. This meant that many animals who were able to communicate their discomfort of arthritis, poor saddle fit and other common ailments were able to benefit from CST, accelerating their own healing process.

Animal Communication is also known as telepathic communication. It is the experience of receiving direct thought transmissions-images, feelings and concepts from individuals, including those of other species. Communication is possible with both living and deceased animals. All beings including humans have the inborn ability to communicate with and understand each other.

The Evenings' Presentation will Focus on;

*What is Animal Communication?*

*Who can Communicate with Animals?*

*How Can We Incorporate Animal Communication into our Lives?*

*Are there Boundaries/Barriers to Communicating with Animals?*

*The Importance of Understanding Species Differences.*

**How to Communicate Psychically with your Beloved Pets and other Animals.  
A Very Interesting and Informative Evening! See You There!**
